Profile

Aspiring Software Developer with knowledge of Core Java, Spring Boot, Spring MVC, REST APIs, and SQL. Skilled in developing backend applications and applying object-oriented programming concepts to solve real-world problems. Strong problem-solving abilities with a keen interest in software development and continuous learning. Looking for an opportunity to start a professional career as a Java Backend Developer.

Education

International Institute of professional studies, DAVV Jun 2023 – Present
MCA (CGPA: 8.0) Indore

Technical Skills

Languages: Java, JavaScript
Frameworks: React, Spring Boot
Tools: Git, GitHub, Netlify, VS Code, IntelliJ IDEA, Android Studio, Postman
Platforms: Railway, AWS

Projects

RURAL SERVICE FINDER Apr 2026
Developed a **Java-based Rural Service Finder** application designed to help users easily access essential local services such as healthcare, education, transportation, and emergency contacts in rural areas. Implemented core programming concepts including **object-oriented programming, data management, and user-friendly interface design** to provide efficient service search and information retrieval.

[Link](#)

Weather app Jan 2026
Built a **Weather Application** that provides real-time weather updates by integrating external weather APIs. Implemented features like **temperature, humidity, and forecast display**, while gaining hands-on experience in **API integration, JSON data handling, and backend logic development**.
